

ATSOA 2025 @ PSB

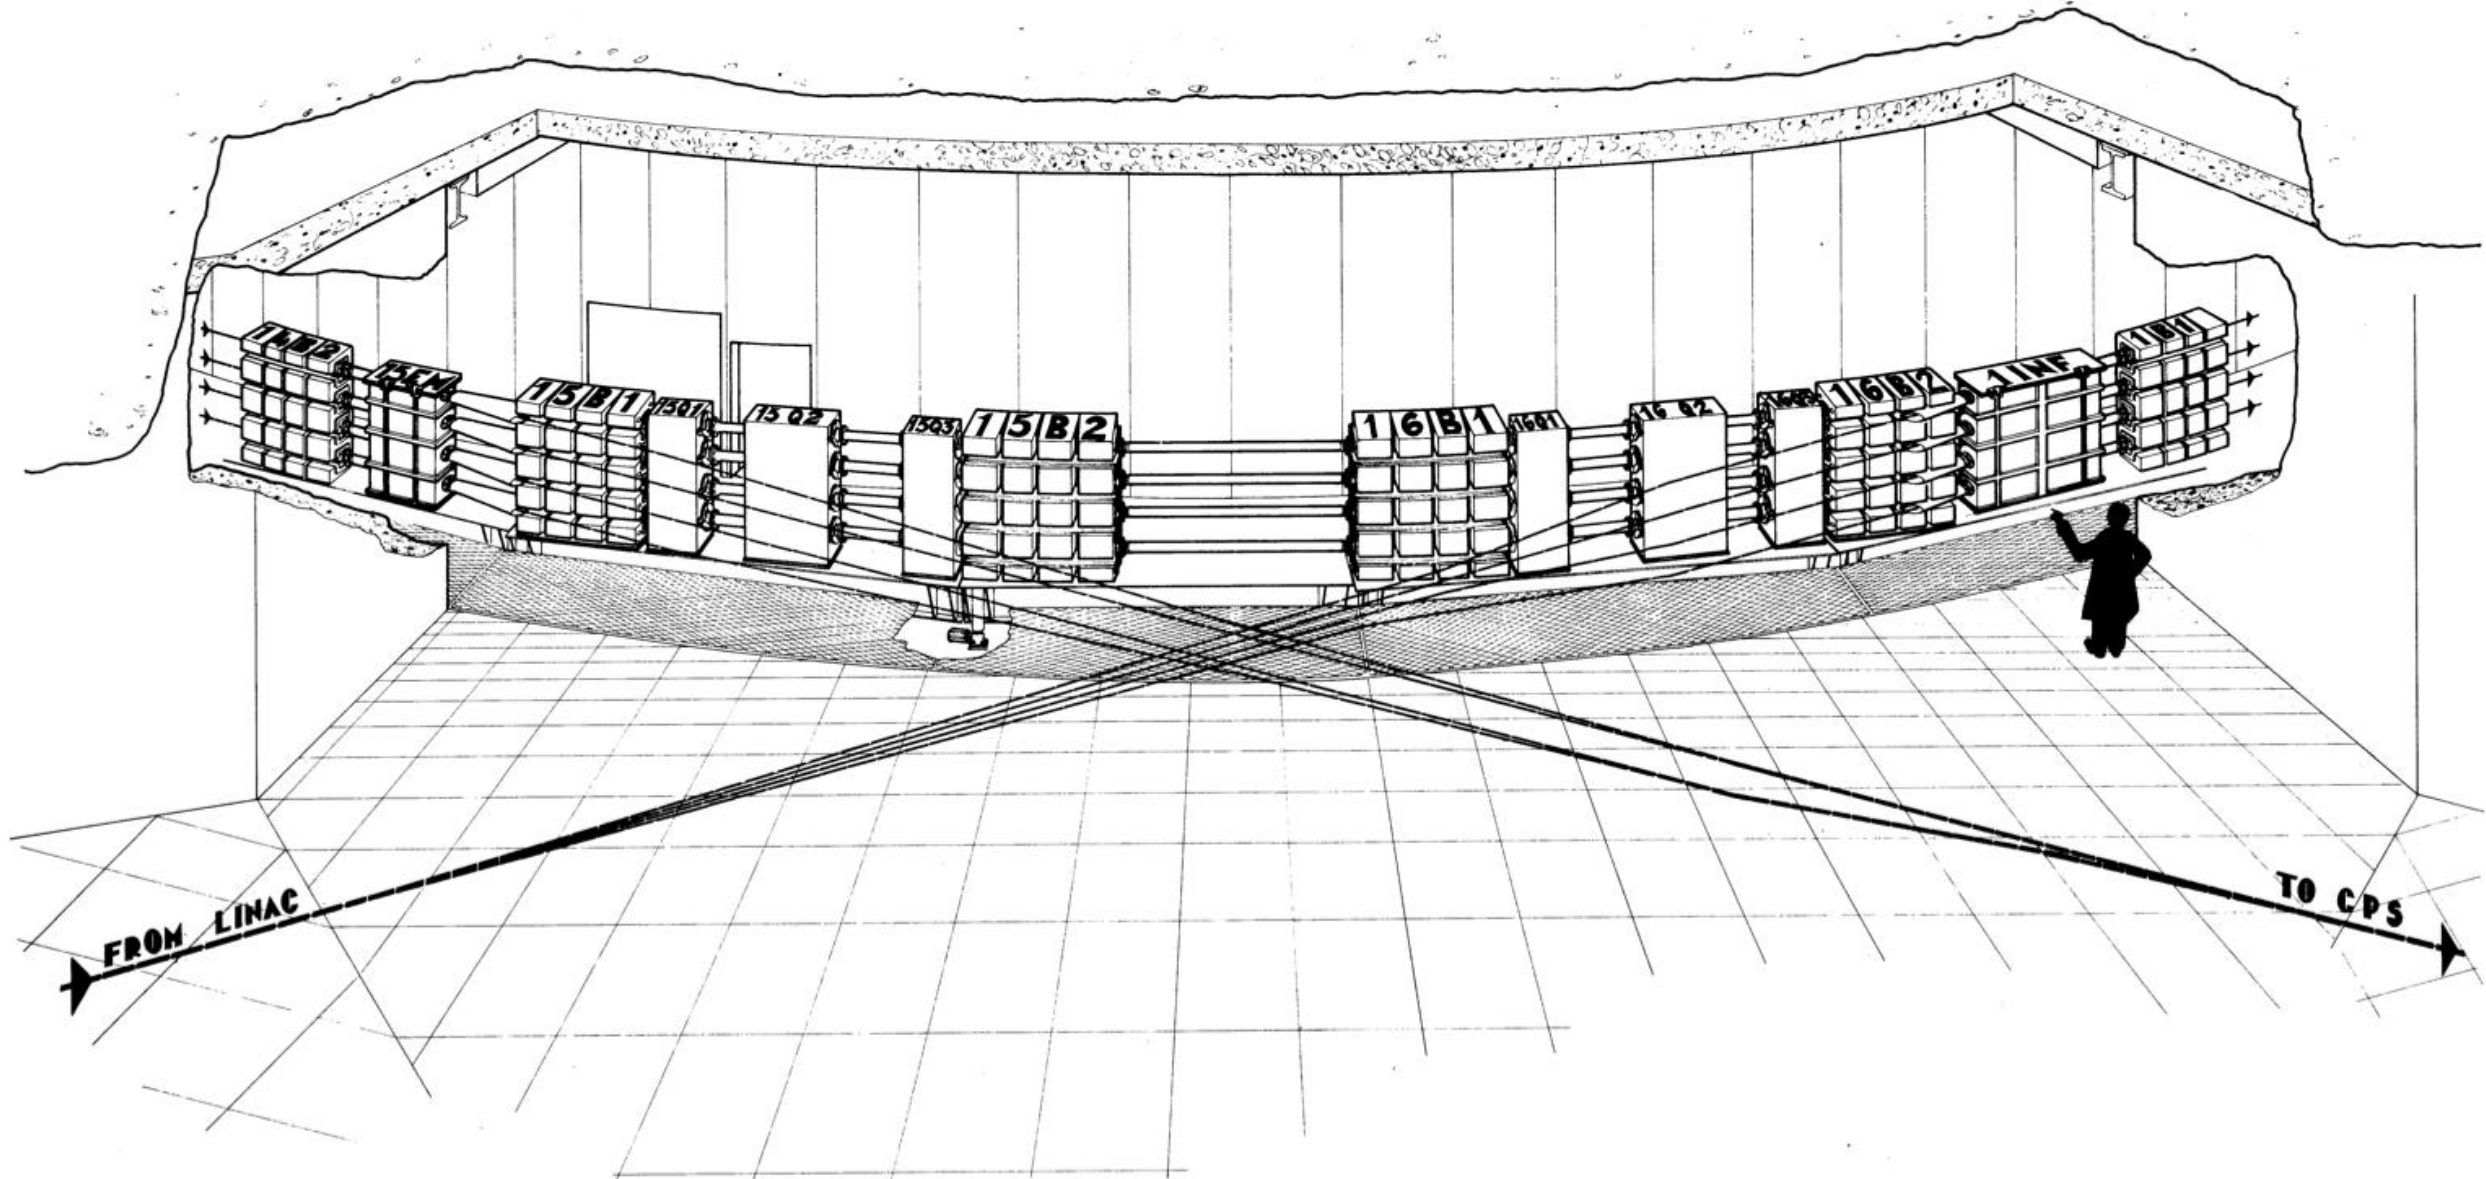

Foteini Asvesta & Tirsi Prebibaj

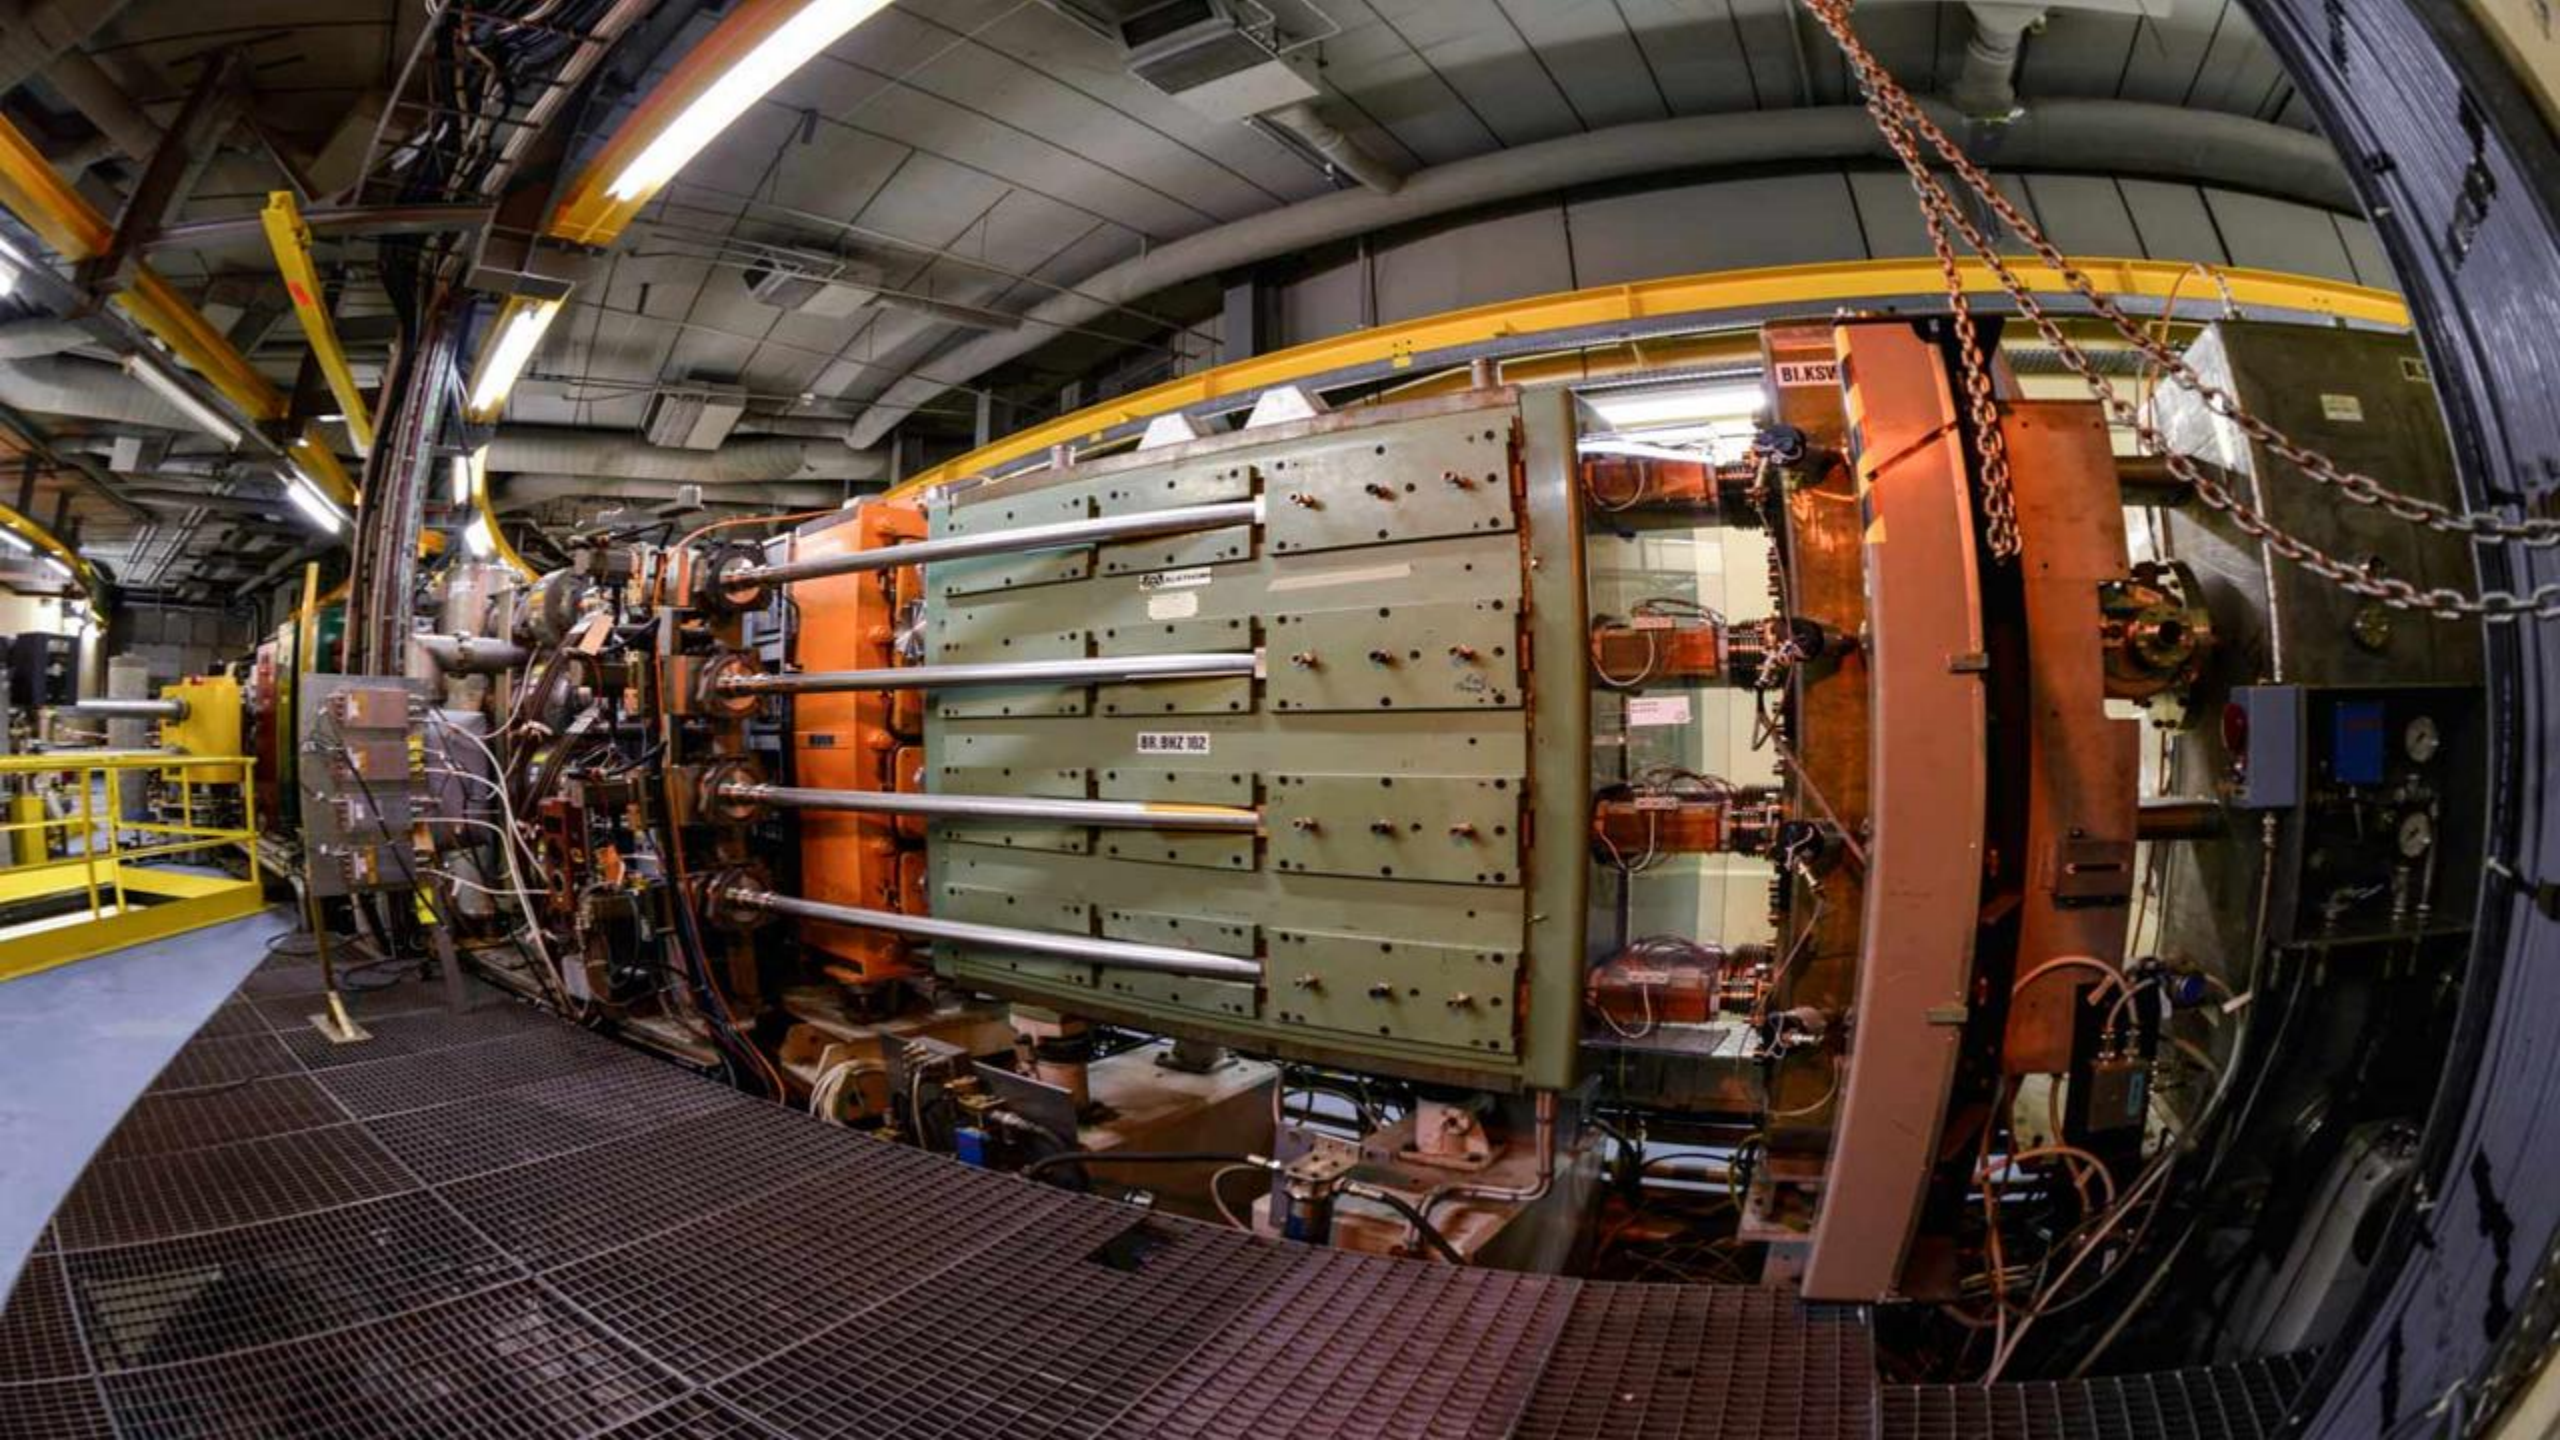

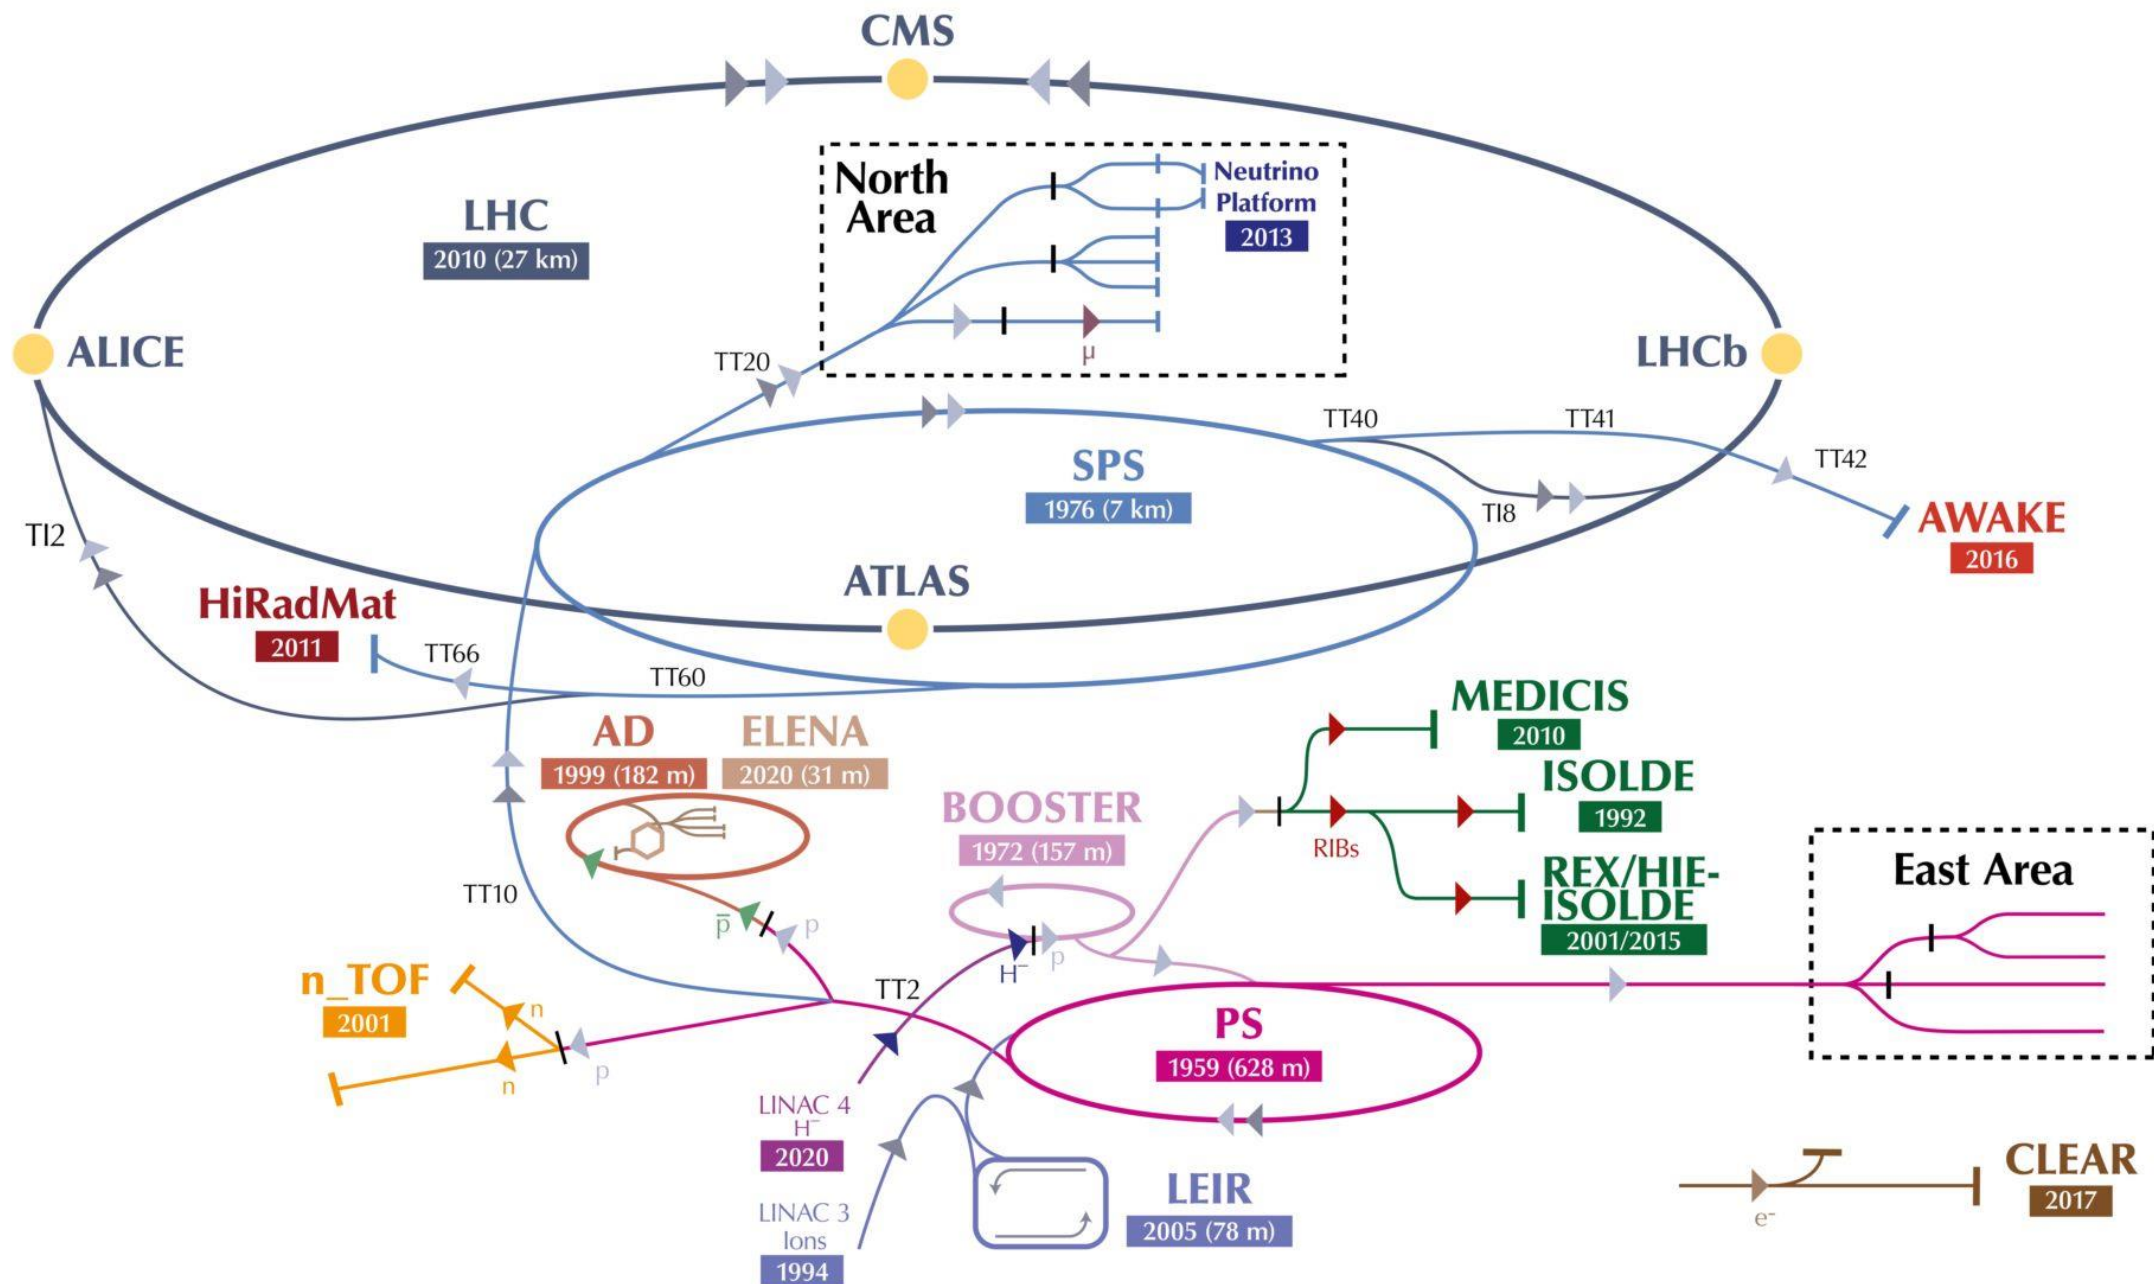

12-16/05/2025

Advanced Training School on Operation of Accelerators – ATSOA2025

EURO-LABS @ CERN

ATSOA 2025 @ PSB

- The PSB training aims at:
 - **Getting familiar with the PSB accelerator** (layout, beams, operation, ...)
 - **Controlling and setting-up the beam** (injection, extraction, controlling machine settings, monitoring beam parameters, ...)
 - **Characterize its brightness performance** and understand the most important beam dynamics effects (space charge, resonances, working point, ...)
- For any question you can reach us by email (tirsi.prebibaj@cern.ch and foteini.asvesta@cern.ch), or by phone to +41754111243.
- All presentations and measurements will be done at the **CERN Control Centre (CCC)**: building 874 (Prevessin site).

How to get to the CCC

- CERN maps (also available for Android & iOS): <https://maps.cern.ch>
- CERN shuttle service: <https://sce-dep.web.cern.ch/cern-shuttle-service>
